Changing blades ERG 072

1 Place the wheel in position 1

2 Fully press the trigger with one hand .

3 Slide out the blade with the other hand & discard safely.

Continue to keep the trigger depressed while you insert the new blade, the bottom edge of the blade must be kept parallel with the bottom edge of the head ensure the blade is pushed fully in.

5 Once the blade is fully in place release the trigger.

6 Reposition the wheel to position 3 (operating position) the knife is ready to use!
