Dorsal Slider Safety Knife

Safety Knife with Dorsal Slider

The blade auto-retracts when the slider is released at the end of the cut.
Ambidextrous & lightweight, aluminium body covered with synthetic rubber.

Professional
 ERG 177

Very easy to use :

- the flexible synthetic rubber coating limits muscle fatigue by reducing the grip forces required.

Excellent grip due to :

- the ergonomic body matched to the shape of the hand and positive grip around the index finger.

Fits all work styles :

-the Dorsal Slider enables both right and left handed operation from the top or side.

The 'Practical' advantages :

- **safe, fast and easy blade changing !**
- storage for up to 3 blades **in the spare blade carrier mounted in the body.**
- supplied with a single ERGLSP 072 blade
