

Innovation at the right price

Side Slider Safety Knife

An ultra compact side slider safety knife with the slide laterally integrated into the body
The blade auto-retracts when the slider is released at the end of cut
Ambidextrous and lightweight body is plastic

Basic
ERG 302

Practical:
Compact: 11.5 cm long and **slim:** fitting easily in your pocket!

Ergonomic:
- **Adaptable to all working positions**, as the (6mm) wide slider sits flush with the body
- **Easy-grip handle** equally suiting both right & left handed users.

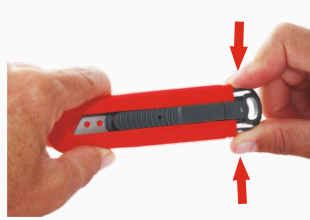

Blade changing without tools:
- Simple and fast from the rear of the knife

Changing Blades ERG 302

1

Squeeze the two tabs at the rear of the unit to unlock

2

Pull out the slider pad

3

Remove the entire slider block and remove the blade

4

Place the new blade (invert to change from right to left handed)

5

Insert the slider block

6

Your knife is ready to use!

Applications

+

ERGLD 254 (blade supplied with the ERG 302)
